Paul Ryan

Senior Frontend Engineer

paul-ryan.online · github.com/Paul-Ryan · linkedin.com/in/paul-ryan-online

Summary

Senior frontend engineer with 7+ years in ad tech, building advertiser-facing campaign, creative and AI tools in React and TypeScript. I own features end to end, from technical design through launch, and maintain the shared component library used across Quantcast's products.

Skills

TypeScript, JavaScript, React, GraphQL, HTML/CSS, Storybook, Accessibility, Jest, React Testing Library, Playwright, A/B Testing, Sentry, Datadog, Data Visualization, AI/LLM Interfaces, Claude Code

Experience

Quantcast

Software Engineer → Senior Software Engineer · Aug 2019 – Present

- **Ads Manager:** Built Quantcast's self-serve campaign management UI app with product, design and backend engineers, covering campaign setup, editing and performance reporting.
- **AI campaign analysis:** Led the frontend for Analysis by Q, partnering with design to turn streamed insights from a LangGraph agent into something advertisers can act on, with charts that render as the data arrives.
- **Design system:** Maintain Quantcast's Storybook component library. Led the rebrand update across all components, including a new data visualization palette.
- **Engineering culture:** Run the monthly Frontend Guild, organizing talks and discussions for frontend enthusiasts and engineers. Topics have included AI-assisted development, monorepo migration, component libraries, datetime libraries, error tracking and security.
- **AI-assisted development:** Added automated Claude Code reviews to a team's CI pipeline and use agentic coding tools daily.

Dynata

UI Developer · Jul 2018 – Aug 2019

- Launched Samplify, a self-serve market research platform for businesses, as one of three founding frontend developers, using React, TypeScript, Apollo GraphQL and Styled Components.
- Introduced TypeScript and unit tests to the codebase to catch errors before release.

App Academy

Web Development Intern · Mar 2018 – Jun 2018

- Ran technical interviews and tutored beginner students.

Bepress

Front-end Web Implementation Specialist · Jan 2014 – Nov 2017

- Designed and implemented open-access academic journals using HTML/CSS templates with a heavy emphasis on accessibility and SEO.

Education

Emerson College · MA, Writing and Publishing, 2012

App Academy · Web Development, 2018
